

Scope of work for The Betty Hardwick Center Parking Lot Renovation shall be as follows:

- The contractor will mill a minimum of 2" off the entire parking lot.
- Repair the subgrade at any pot holed areas
- All sections holding water shall be repaired in a manner that creates positive drainage
- The contractor will then tack the milled and repaired parking lot and repave with 2" of compacted Type D Asphalt.
- Contractor will be responsible for striping the parking lot as requested by a representative of The Betty Hardwick Center
- Contractor will be responsible for replacing the electrical loop for the automatic gates
